

"A choice of equipment that responds to all your needs."

BRC 2400 anti-projection door option

► All our equipment **SD - LF - JM - SDC - BRC** can be optionally equipped with guard frames and adjustable shoes.

► The **JM** range is available with an optional offset coupling.

JM 1800 guard option

## ► JM technical specifications //

Type	Gearbox power (HP)	Width (m)	Weight (kg)	Cutting assembly
JM 1200	35	1.20	300	3 ø 16 chains
JM 1500	65	1.50	400	3 ø 16 chains
JM 1600	80	1.60	500	3 ø 16 chains
JM 1800	100	1.80	600	3 ø 16 chains
JM 2000	150	2.00	780	3 ø 16 chains

## ► SDC-BRC technical specifications //

Type	Gearbox power (HP)	Width (m)	Weight (kg)	Cutting assembly
SDC 1500	100	1.50	700	3 ø 22 chains
SDC 1600	150	1.60	800	3 ø 22 chains
SDC 1800	150	1.80	1000	3 ø 22 chains
SDC 2000	200	2.00	1200	3 ø 22 chains
SDC 2200	200	2.20	1400	3 ø 22 chains
SDC 2400	200	2.40	1600	3 ø 22 chains
BRC 2400	150	2.45	1500	2x3 ø 22 chains

Cutting assembly with SDC chains

► Research and innovation, a passion:

A recognised specialist in forestry brush-cutting operations for more than 50 years, Grenier Franco ensures the technical development of its equipment to ensure the highest degree of operational reliability.

Keen to meet the needs of its clients, Grenier Franco develops tools that are increasingly powerful and profitable for your company.

LF 2000

LF Cutting assembly

All of our ranges **SD/SDC/BRC/LF** can be equipped with a variety of options:

- rear anti-projection door
- branch guard
- adjustable shoes

► Technical specifications //

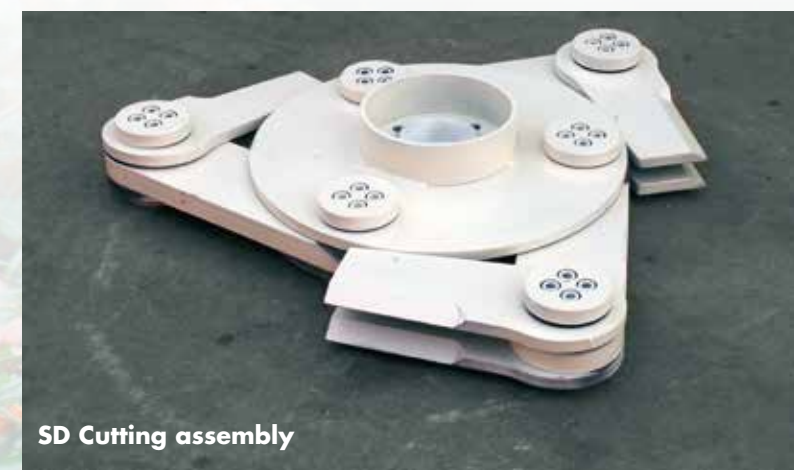

Type	Gearbox power (HP)	Width (m)	Weight (kg)	Cutting assembly	Anti-projection door
SD 1800	200	1.8	1000	6 Blades	Option
SD 2000	200	2	1200	6 Blades	Option
LF 2000	200	2	1800	3 inclined blades	Standard

► The strong points of SD-LF brush cutters

- Abrasion-resistant high-tensile steel.
- The rotor is equipped with arms and blades held in place by oversized pins.
- Blades retractable at 2 points ensuring greater flexibility and avoiding violent impacts.
- The hydraulic anti-projection doors on the entire range of **Grenier Franco** brush cutters are fully protected by the thrust bar.
- The design of the fabricated structure allows for unobstructed discharge of the shredded material.

SD Cutting assembly

SD Cutting assembly

BRC 2400 / Hydraulic door

- **Grenier Franco** forest brush cutters are simple, rugged and designed specifically for heavy ground-clearance work.
- They can be used to maintain trails such as forest roads, electrical power lines, partitioning, prairies, etc.

JM 1800

CHAIN-TYPE CUTTING ASSEMBLY STARTING WITH THE SDC 2200

► Special features of LF models

- The inclined-blade type cutting assembly offers better retraction in a horizontal and vertical plane.
- The raised cutting platform of the **LFs** considerably reduces vegetation/ground friction and guarantees increased power and better control over the wear of cutting components.
- The inclined design of the structure on the coupling side significantly reduces projections and offers enhanced crushing quality.
